- Coding
- Reading History
- Exploring Technologies

## PROFILE

Full Stack MERN Developer passionate about building user-friendly UIs, efficient backend logic, and secure APIs, while continuously exploring new technologies. Always eager to learn, solve problems, and take on challenging projects.

## PROJECTS

### AI-Powered Skillswap Network

11/2024 - 09/2025

- A peer-to-peer learning platform for students, featuring gamification, achievements, posts, live meetings, and leaderboards, recognized for having one of the best UIs among all capstone groups.

### Online Book Store

06/2024 - 08/2024

- A React Native e-commerce app with Firebase Realtime Database integration , featuring cart and wishlist management , and the ability to place single or multiple product orders with quantity adjustments . The UI and features were inspired by the Daraz app , ensuring a familiar and user-friendly shopping experience.

### Hospital Management System

06/2023 - 08/2023

- Built with HTML, CSS, JS, and PHP using phpMyAdmin SQL . Features include patient registration, report and bill management, discharge sheets, and role-based access for admins, doctors, and patient care staff.

### Library Management System

06/2023 - 08/2023

- Implemented custom LinkedList, ArrayList, and BST to manage books, users, and transactions with role-based features, focusing on strengthening OOP concepts.

## CERTIFICATES

### InnovateX 1.0 Hackathon

Hackathon organized by Brackets Pvt. Ltd. at Gift University  
- Aug 2024
